QuickTrack Demonstration Software Installation And Use

1. Unzip the file you have downloaded you may have already done this.

2. Double Click the QuickTrackV4Pro icon in the folder to start the application.

3. A window will appear giving you information about QuickTrack.

4. Follow the on screen instructions to setup Quicktrack for the first time.

   If you don!t know what settings you require stick with the default settings or just click Next to go though the settings.

   Full details of all the settings are covered in the PDF manual QuicktrackManual.pdf a link to which is in the Start Menu next to Quicktrack.

5. Create a new user and a new item to get started with Quicktrack.

   The demonstration software is limited in a number of ways.

   The number of items, users and locations is limited to 10.

   There are limitations on printing reports, and various other settings and functions.

6. To uninstall the software, just delete the folder on your desktop.
